4. HTML5

All material must be delivered at least 5 business days before the campaign starts in the form of a zip file or via Wetransfer

RECOMMENDATIONS FOR <u>HTML5</u> MATERIAL

HTML5 creatives must be <u>SSL compatible</u> to serve to HTTPS sites.

Make sure your creative uses the click tag variable as the click destination.

The click tag should be easy for the ad server to read — no minification or obfuscation, though you can use minifiers in the rest of your code and other files.

We don't recommend hard-coded clickthrough URLs in your asset

BELOW THE CLICKTAG CODE TO INSERT IN THE HTML FILE

A click tag should be inserted in the <head> of an HTML document. See this example:

<html>

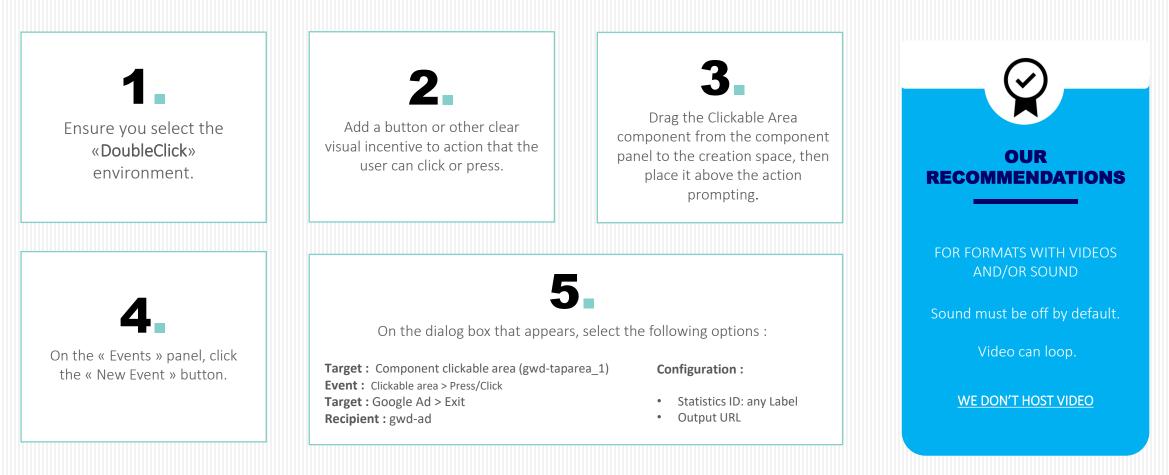

<head> <meta name="ad.size" content="width=300,height=250"> <script type="text/javascript"> var clickTag = "http://www.google.com"; </script> </head> [The rest of your creative code goes here.] </html>

In the body of your HTML document, your creative must use the click tag variable as the click-through URL:

HTML5 ELEMENT MADE WITH GOOGLE WEB DESIGNER

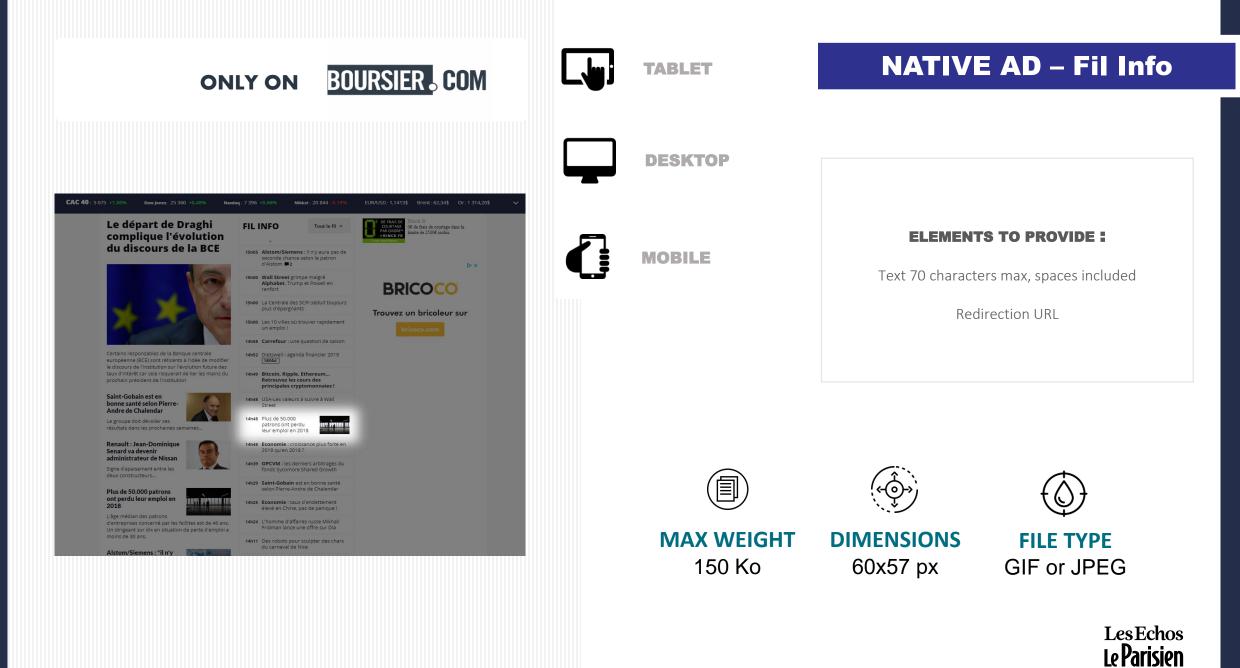

If you use Google Web Designer to build HTML5 creatives, you must add an exit. An exit is any clickable area that directs the browser to a landing page.

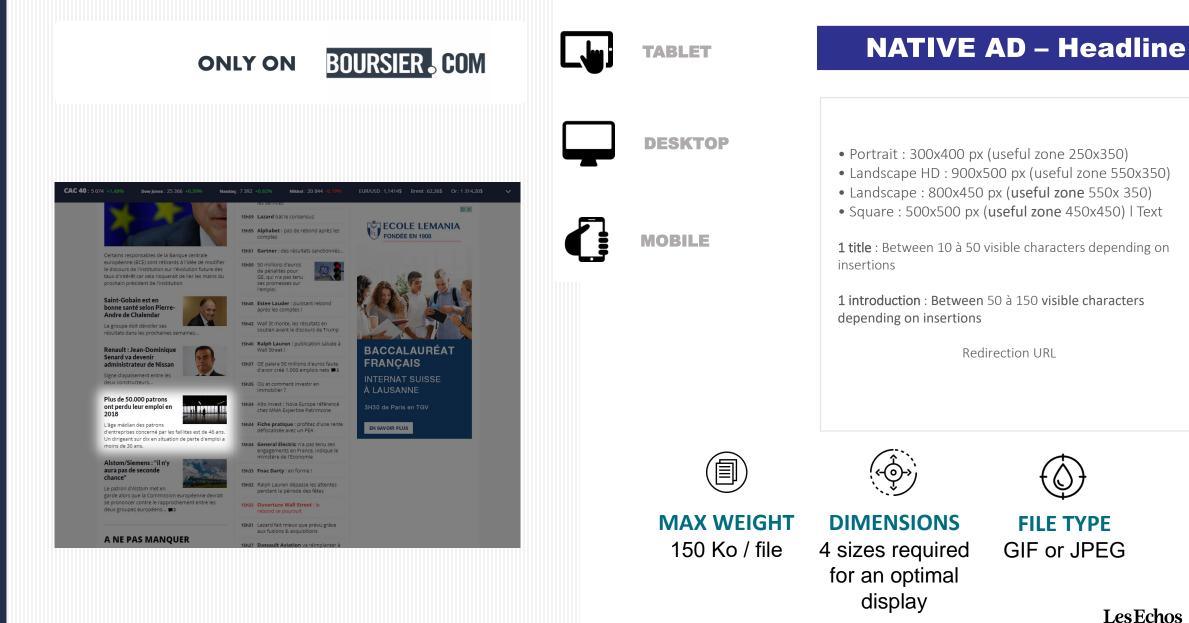

5. NATIVE ADS

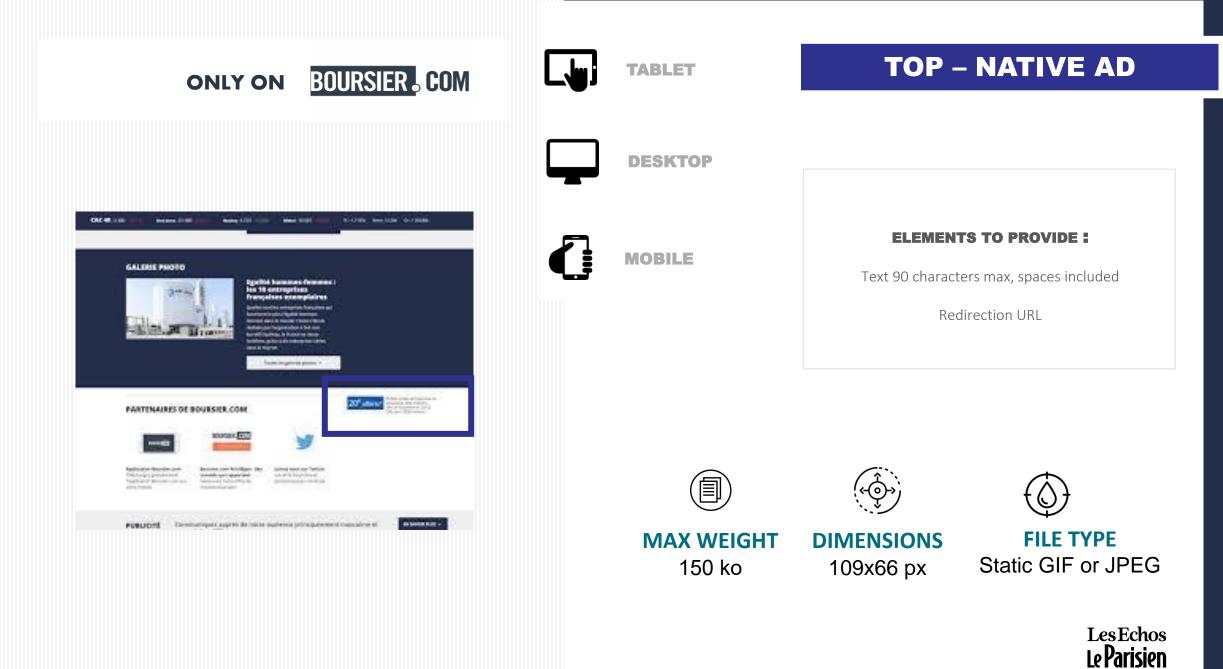

All material must be delivered at least 5 business days before the campaign starts in the form of a zip file or via Wetransfer

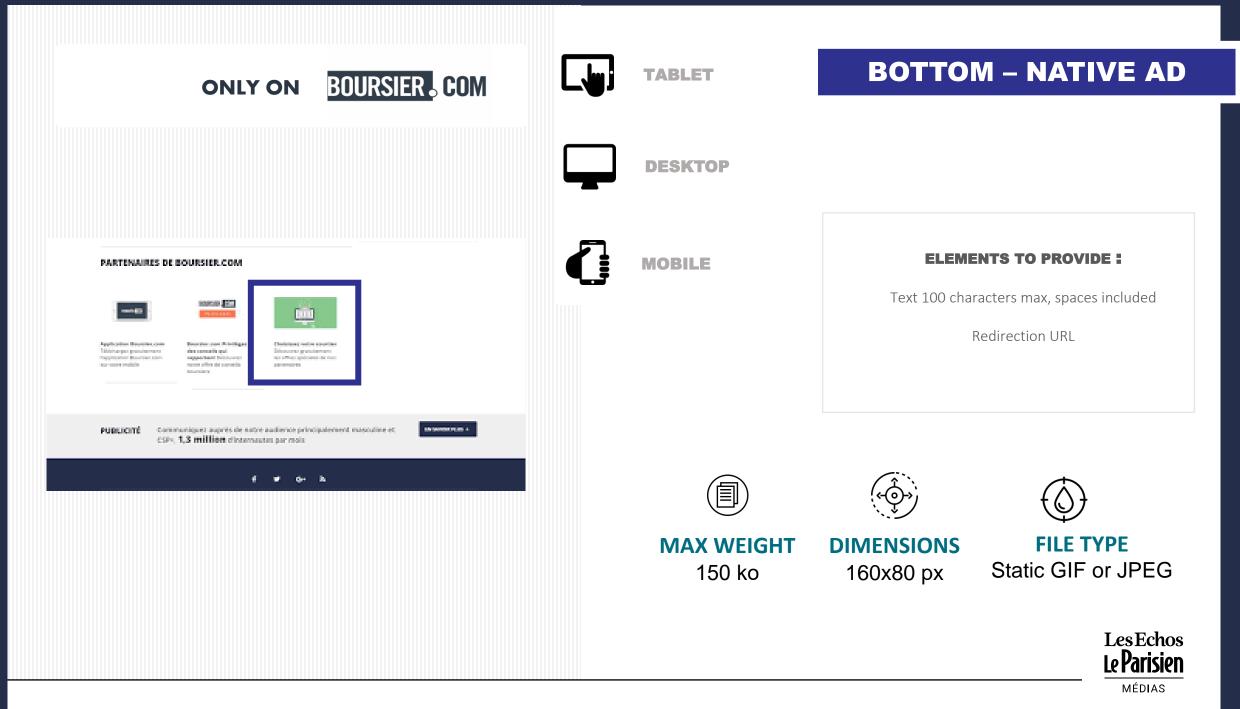

6. EMAILING

All material must be delivered at least 5 business days before the campaign starts in the form of a zip file or via Wetransfer

> Les Echos Le Parisien MÉDIAS

HTML & TECHNIQUE

Always put a background color in HTML Use only the 5 system fonts for the dynamic text (arial/verdana/times/...) Proscribe flash technologies, javascriptBan the «CSS» which pass very badly in messaging services For weight reasons it is desirable to have several small images rather than a single one You should not put a «backgroundimage» because many browsers misinterpret the «background» code The HTML title of the page must be correctly filled in DOCTYPES must be in HTML4 The Meta tag must be filled in No tag <linkrel> or <styletype=»text/css»> or <script> above the </head> of the page No tags No tags <DIV> All characters must be HTML encoded Use the tag to format text, color, size, and font Check all apostrophes : use : ' and not ' (Word OFFICE character) All dimensions must be in pixels and not in %. Never Height for the TABLE No XML tag closing like
 always

Any tracking elements (pixels,clic-command) are to be implemented by you and directly in the delivered file The words «mirror page» and «unsubscribe» are automatically added.

OUR RECOMMENDATIONS

HTML File size : **30 Ko maximum** Total file size with images : **150 Ko maximum**

ELEMENTS TO PROVIDE

An HTML file already built with the content of the emailing Subject of the emailing The sender's name An email adress to allow internet users to reply

GRAPHISM AND STRUCTURE

Prioritize the message Place the logo on the top left corner Reassemble the main message elements in the preview window (approximately 300 pixels high) Visible and explicit buttons and links Underline links only Have graphic consistency with other channels / website / and emails between them Define landing pages in a relevant way (always have consistency between the link and the page to which it leads) Write short texts and rather in column Give structure to emails, clearly identifiable areas Use animations to highlight certain elements Max weight for the element 100 Ko

7. NEWSLETTER

All material must be delivered at least 5 business days before the campaign starts in the form of a zip file or via Wetransfer
